

## **STRENGTH IS IN OUR DNA.**

**Armorloc™ 3L primary backing delivers DNA binding force. Nature has a way to make sure the strong survive.**

ArmorLoc™ 3L utilizes a complete woven system as the foundation to deliver the world's strongest artificial turf system.

Primary backing plays a vital role in the overall design of an artificial turf system. ArmorLoc™ 3L is non-directional, dimensionally stable and ensures no excess movement. Combined, ArmorLoc™ 3L with Silverback™ urethane coating and specialized yarns work together binding the DNA of all three components creating a thermoset bond. ArmorLoc™ 3L delivers the science of DNA strand building.

This propriety formulation and combined system is the foundation you can count on for the life of the product.
