

Peru State

HIGHLIGHT REEL

OAK BOWL STADIUM

The football field at Peru State was first installed in 2013 and it was part of a 9 million dollar stadium upgrade project. The turf is Sporturf PowerHouse 44oz, with 2.25" pile height. Even after a few years of constant abuse by the Peru State football team the turf looks phenomenal. So if you were concerned that a football team would tear up your brand new field in the first season then you are sorely mistaken. You can clearly see that our Powerhouse product can withstand whatever a team can throw at it.
