

# Webb City

## HIGHLIGHT REEL

### CARDINAL STADIUM

Midwest Synthetic Turf was contracted to install a new football field for Webb City High School after the existing turf reached the end of its useful life. The existing drainage base was not draining correctly so the necessary repairs were added as part of the project. School officials were very interested in pad underlayment as a way to improve GMax performance so Craig Shonk and his team installed a Brock pad under the field.

#### FACILITY

Cardinal Stadium (2017)
