Our non-rubber infilled turf has all of the advantage of previous generations and then some. The benefits of Sporturf™ AT740 include high resistance to wear and the fact that messy infill is not required. The almost perfect 50/50 blend of nylon and polyethylene provides a true ball roll generally only found in high pile rubber infilled turf. Also, no rubber means less maintenance. Keep in mind, all Fast Grass systems can be outfitted with Velcro seams for ease of portability.
