

North Miami

HIGHLIGHT REEL

North Miami Athletics

SCG Fields, LLC worked with North Miami Athletics to install a Sporturf™ multipurpose soccer and football field in Miami, Florida. Officials from North Miami Athletics worked the SCG and Sporturf team to choose a color for the coaches' boxes that would very closely match the newly resurfaced track. The turf system that was selected consisted of Sporturf™ GameChanger paired with an alternative infill called Envirofill from US Greentech and a ProPlay shock pad from Schmitz Foam Products. The entire project was purchased through our partnership with NJPA.

PRODUCT

GameChanger 52H

FACE WT/PILE HEIGHT

52 oz / 2½ in

This is a multi sport field product. This product should be installed outdoors on a compacted aggregate base. The GameChanger series is the world's first tufted fabric utilizing 3 ends per needle. The 3C "Triple Coverage" system allows for more face yarn to show off its beautiful colors. This 14,000 denier system will keep your field looking newer, longer with over 50% more yarn denier above the rubber infill.
