

Carson-Newman

HIGHLIGHT REEL

Home of the Eagles Baseball Team

Sporturf™ dealer Baseline Sports Construction installed a project at Carson-Newman University in Jefferson City, TN. The athletic department wanted to transform and equip Silver-Diamond Complex with a professional and inviting facility. They upgraded the Eagle's dugout to connect to the locker room, giving the players a sense of the big leagues. The university's renovation strategy also has been helping with recruiting. Baseline's finished product created a professional look and made the field suitable for play for years to come. Fielder's Choice is designed and tested to mimic natural sod for the players to predict baseball's fundamental physics.
